

ArchiveOne Express Version 6.0 SR1 Release Notes

Introduction

These release notes are for ArchiveOne Express Version 6.0 SR1 (build 2455). They detail the changes between this version and the previous (Version 6.0), how to install or upgrade to this version and the licensing / version assurance implications.

Installation

The product is supplied as a full standard installation package.

There are no specific requirements or changes to the normal install procedure. See the ArchiveOne Express documentation for details on installing.

In place upgrades can be conducted as long as the customer is running the 5.8 SR2 version of the component (Service, Websites, Quicklink Client, laptop Client or Admin Console)

Note: If you have deployed a prior version of the Quick Link, PST Processor or Laptop Client, it is necessary to deploy the 6.0 SR1 version of these components

Licensing / Version Assurance

This is a full release update and as such is only available to customers with a valid Software Version Assurance (SVA) contract.

Note: Customers without valid Version Assurance can contact their Account Manager to reinstate version Assurance and then upgrade to this version.

Support

Support on any C2C products can be obtained, by customers with a valid support contract, from:-

New Features

System Health Check

A new System Health Check feature has been added which runs a predefined set of health checks on a regular basis and emails the results to an Administrator.

All results are available in a HTML format from a dedicated node in the Admin Console.

Deployment Analyzer V2

The new ArchiveOne Deployment Analyzer (version 2) tool is now installed by default on each install. This is also run as part of the installation process, allowing early identification of any potential issues.

Enhancements

Deployment Analyzer V2

The new ArchiveOne Deployment Analyzer (version 2) tool is now installed by default on each install. This is also run as part of the installation process, allowing early identification of any potential issues.

CloudDR

The CloudDR module has been extended to allow migration between onsite and cloud repositories and regular integrity checking.

CloudStorage

A new module 'CloudStorage' has been added to the repository options. This module allow storage of all the repository data and index in C2C CloudStorage service.

Known Issues

ID	Title
6467	ADA: Should we have a "retry" button after tests run during installation?
6470	ADA: Admin Console may crash when trying to set the schedule date >year 3000
6472	ADA: Information purposes tests are inconsistent
6474	ADA: Changes in email notification applied after cancelling
6492	Some browsers can't display results website
6494	Obscure case of a block of skipped mails causing zipmaker abort
6495	Aborted zipmaker doesn't write archive history
6502	Odd characters displayed on the website in a repository name
6503	Unnecessary toolbars on the results website
6523	User should be warned when any tests fail
6528	ADA: Date/Time format displayed for the Test run in MMC and ADA Results in ArchiveOneWebAdmin should be of the same format
6543	ADA test results inconsistent
6565	Zipmaker completion should report orphaned items
6569	Changing an Onsite Repository to a DR Repository Archive folder should be the default Cache folder
6570	User should be allowed to Migrate the Repositories only by selecting the context menu options
6580	Error message should appear when trying to run System Health tests while ADA uninstalled
6586	System Health tests won't run if incorrect email is specified
6601	ADA: The 'view report' option shows test results but doesn't show repository names etc
6602	MMC crash from restarting service then doing 'test email' in admin
6606	BrowseArchive "Loading..." doesn't get translated
6607	BrowseArchive title in IE is "Mail Box"
6627	Archive process skipped after archiving 42 items
6631	We need ADA test for ASP.NET being prohibited
6632	Renaming a policy loses its dynamic data
6634	Default tracing should be set to "standard" instead of none in Policy
6635	Trace levels not matching message has space between Archive and One
6646	Date/Time columns incorrectly sorting on the jqGrid results (Admin/Search) websites
6652	Message saying you cannot Start ArchiveOne policy as there is another policy running has a space between Archive and One
6657	Shutting down and restarting of the Policy service should be graceful

Fixed Issues

ID	Title
6642	admin crashes when defining drive mapped storage manager repository
6644	Changing Aonesearch website from english to french does not change all the text in the page after refresh
6643	Aonesearch Look and feel is different from that of the legal console search.
6657	Shutting down and restarting of the Policy service should be graceful
6646	Date/Time columns incorrectly sorting on the jqGrid results (Admin/Search) websites
6652	Message saying you cannot Start ArchiveOne policy as there is another policy running has a space between Archive and One
6656	Change name of AmazonS3 storage manager
6634	Default tracing should be set to "standard" instead of none in Policy
6635	Trace levels not matching message has space between Archive and One
6627	Archive process skipped after archiving 42 items
6628	Increase upload timeout for Amazon Storage Manager
6618	Compliance should have repos 'convert to dr'
6617	Compliance repos node menu wrong
6630	Xml error in ADA test results when DB cannot be accessed
6616	Two bugs merged from Delta
6626	The 'delete attachments' action gets 'unknown' as the summary
6622	PST finalizing icons are gone
6629	"Last run" and "Last status" columns not updated in a policies node
6609	Upgrade from 6 to 601 doesn't install Amazon storage manager
6620	Windows configuring ArchiveOne Enterprise (Policy) while creating new Repository
6621	Upgrade from 6.0.0 to 6.0.1 doesnot list the Amazon cloud storage repositories.
6632	Renaming a policy loses its dynamic data
6631	We need ADA test for ASP.NET being prohibited
6598	MANUAL needs to mention repository validation schedule
6610	The 'convert to DR' dialog has the title "Dialog"
