

How to Install Quick Link Client or Laptop Client

Applies to: ArchiveOne® Express; Topic Last Modified: 27 January 2010

Note

This topic explains how to install either the Quick Link Client or Laptop Client for ArchiveOne Express.

Before You Begin

Before you perform the procedure in this topic, be aware of the following:

- Must have proper user permissions to install software on the client PC.

Procedure

To install the Quick Link Client

1. Use **Start**->Run to access ArchiveOne Express' installation path which default to [\\ArchiveServerName\C\\$\Program Files\C2C Systems\Archive One](#).
2. Locate & run the **QLC Installer** "ArchiveOne Quick Link Client.msi" or the **Laptop Client Installer** "ArchiveOne Laptop Client.msi".
 - You'll be clicking Next through this Wizard, only making optional changes to one screen.
3. The second screen of the **Wizard**, Customer Information, can optionally be modified to contain a specific User Name and Organization.
 - These two values are only visible in this Wizard; setting this screen is entirely optional.
4. Click the **Install** button to install the software.
5. Finish the wizard.

For More Information

For assistance with other features of ArchiveOne Express, see the other ArchiveOne Express documentation available from C2C:
